Process Improvement Engineer

AcuTemp Thermal Systems is a manufacturer of temperature-sensitive packaging and shipping solutions. We combine superior proprietary technologies with unmatched systems expertise to deliver high performing temperature management solutions. Our storage solutions range from small passive shipping boxes to large active pallet-size shipping containers equipped with sophisticated data-logging capabilities. Our products are marketed directly and through a global network of distributors to businesses with temperature sensitive requirements in the pharmaceutical, biotechnology, public health, defense and transportation/logistics markets.

We are a growing, dynamic company with an opening for a **Process Improvement Engineer**. The engineer will drive significant and sustainable product cost reductions in all AcuTemp and ThermoCor products. This position reports to the VP – Technology & Business Development.

RESPONSIBILITIES:

- Using Lean Manufacturing, Lean Product Development, and process improvement techniques (such as Six Sigma and Juran Methodologies), quantify the opportunity for improvement.
- Devise and implement improvement projects to realize significant waste reduction in current products and processes.
- Act as Advanced Process Engineering to develop processes for new products that enable high success rates at product launch.

JOB QUALIFICATIONS:

- Bachelor's Degree in Mechanical, Manufacturing, or Industrial Engineering minimum. Master's Degree preferred.
- Process improvement qualifications (Six Sigma belt, Juran Methodologies training, Lean Manufacturing, and/or Lean Product Development) must be demonstrated.
- 10+ years of relevant experience in a manufacturing industry with significant roles as Process Improvement Engineer or equivalent.
- Must have superb interpersonal skills, both written and verbal, at all levels within an organization.
- Must possess analytical thinking and reasoning skills.
- Must be thorough and exercise attention to detail.
- Must be driven, dedicated, and able to set and maintain schedules.
- Must thrive in an environment with many opportunities for improvement and a strong desire to realize the improvements quickly.
- Primarily factory environment, some travel (less than 20%)

We are committed to selecting the best people for our positions and helping them develop the job skills to realize their full potential. We offer a competitive salary and benefit package. Please email your resume to:
