

FOR IMMEDIATE RELEASE

**Jeff Wodrich Joins AcuTemp Thermal Systems as
Strategic Business Development Manager – Life Sciences**

Dayton, Ohio USA, February 22, 2010: AcuTemp Thermal Systems, www.acutemp.com, a manufacturer of temperature controlled packaging solutions for the pharmaceutical and biotechnology industries, announces the addition of Jeff Wodrich to its sales team. As Strategic Business Development Manager for Life Sciences, Mr. Wodrich will provide sales leadership for strategic customer accounts in the life sciences market.

Mr. Wodrich brings to the position over 15 years of sales management experience in the packaging industry with significant focus on specialty logistics packaging for temperature sensitive products in the pharmaceutical and biotech industries. Prior to joining AcuTemp, Jeff served as General Manager for the testing and service division of Illinois-based Tegrant Corporation/ThermoSafe Brands, and most recently held the position of Western Regional Sales Manager for packaging manufacturer, FP International, in Redwood City, California.

“We are very pleased to have Jeff join the AcuTemp sales team,” said Vincent Reidy, Vice President of Sales for AcuTemp. “Jeff’s considerable experience in cold chain package development and testing will be a valuable asset to our life sciences customers as AcuTemp continues to strengthen its position as a preferred provider of performance solutions for shipping temperature sensitive products.”

Mr. Wodrich will focus his business development efforts on presenting AcuTemp temperature controlled passive boxes and active container solutions to pharmaceutical and biotech companies in the Western US. The company’s passive shipper capabilities include a line of ISTA qualified boxes as well as the ability to design and manufacture custom solutions tested to a customer-specified protocol. All AcuTemp passive solutions are eligible for participation in the company’s sustainability REPAQ™ program – a reusable program that retests the thermal integrity of each passive shipper before reuse.

Mr. Wodrich holds business management degrees from Northern Arizona University and the University of Phoenix.

About AcuTemp Thermal Systems

AcuTemp Thermal Systems designs and manufactures reliable thermal management products used to maintain valuable temperature-sensitive payloads at The Right Temperature[®] during transit. Offerings range from small passive shipping boxes to large active shipping containers equipped with sophisticated data-logging capabilities. The company also offers advanced thermal testing and package validation services in its ISTA-certified testing laboratory. AcuTemp products are marketed directly and through a global network of distributors to businesses with temperature sensitive requirements in the pharmaceutical, biotechnology, public health, defense and transportation/logistics markets.
